

CoachPro

SaaS Sports Coaching Academy Management Platform

Product Requirements Document · v3.0 · Non-Technical

Document Type	Product Requirements Document — Non-Technical	Status: Draft v2.0
Product Model	Multi-tenant SaaS — one platform, many academies	Version: 2.0
Scope	v1.0 Core MVP + SaaS architecture + Pricing strategy + Roadmap to v3.0	June 2026

1. Executive Summary

CoachPro is a multi-tenant SaaS platform that empowers sports coaching academies to manage every aspect of their operations from a single, cloud-hosted application. Any academy can sign up, onboard their coaches and students, and be fully operational within minutes — no software installation required.

The platform handles student enrolments, batch scheduling, one-to-one coaching sessions, fee tracking, finance reporting, and automated SMS communications. Each academy's data is fully isolated from all other tenants on the platform.

v1.0 delivers the core academy management MVP. Subsequent releases layer in attendance, parent portals, online payments, and a full finance dashboard — each building on the same solid data model without requiring rewrites.

2. SaaS Product Model

CoachPro is offered as a subscription-based Software-as-a-Service product. Academies pay a recurring fee to access the platform; they never install, host, or maintain any software themselves.

2.1 Multi-Tenancy

Each academy that signs up becomes a Tenant — a completely isolated workspace on the platform.

- All data (students, coaches, batches, fees, schedules) belongs exclusively to the academy's tenant.
- No academy can see or access any other academy's data.
- Each tenant gets a unique subdomain: e.g., greenfield.coachpro.app
- Tenant administrators manage their own users, settings, and billing independently.

2.2 Subscription Tiers (Indicative)

Exact pricing is a business decision, but the platform is architected to support tiered plans from day one. Suggested tier structure:

Tier	Includes	Student Limit	Target
Starter	Core MVP features, 2 coaches, SMS (100/mo)	Up to 50	Small / new academies

Tier	Includes	Student Limit	Target
Growth	All Starter + Attendance + Parent portal, 10 coaches, SMS (500/mo)	Up to 200	Mid-size academies
Pro	All Growth + Finance dashboard + Online payments, unlimited coaches, SMS (2000/mo)	Unlimited	Large academies
Enterprise	Custom limits, dedicated support, white-label option, SLA	Unlimited	Franchise / chains

2.3 Tenant Onboarding Flow

- Academy owner visits coachpro.app and clicks 'Start Free Trial'.
- Fills in academy name, sport(s), admin email, and mobile number.
- Account is created instantly; a unique subdomain is provisioned automatically.
- A guided setup wizard walks the admin through: adding coaches → creating batches → enrolling first students.
- Trial period (e.g., 14 days) gives full Pro access; payment details collected before trial ends.
- On payment confirmation, the tenant is activated on the chosen plan.

2.4 Data Isolation & Security Principles

Note: detailed technical security architecture is outside this document's scope. The non-technical requirements are:

- Each tenant's data must be logically isolated — no cross-tenant data leakage under any circumstance.
- An admin of Academy A must never be able to view, edit, or export data belonging to Academy B.
- All data must be encrypted at rest and in transit.
- Tenant admins can export all their academy's data at any time (data portability).
- Tenant admins can request account deletion, which triggers a GDPR-compliant data erasure workflow.

3. Problem Statement

Sports coaching academies — from small neighbourhood clubs to large multi-sport franchises — share a common set of operational struggles:

- Student records managed in paper registers or scattered spreadsheets, with no single source of truth.
- Coach schedules coordinated over WhatsApp, leading to conflicts and missed sessions.
- Monthly fee collection tracked manually; overdue follow-up done via phone calls that consume admin hours.
- No visibility into whether the academy is profitable or which batches are financially draining.
- Coaches have no self-service tool to view their own schedule or student list.
- Franchises and growing academies have no way to replicate their setup across multiple locations.

CoachPro solves all of these problems and delivers them as a subscription service that any academy can adopt without an IT team.

4. Goals & Success Metrics

4.1 Business Goals (SaaS Platform)

- Achieve product-market fit with small-to-mid-size academies in the first 6 months post-launch.
- Build a self-serve onboarding flow that requires zero manual intervention from CoachPro's team.
- Design every feature to work for any sport — cricket, football, badminton, swimming, gymnastics, etc.
- Create a billing and subscription system that scales from 1 to 10,000 tenants without structural changes.

4.2 Product Success Metrics

Feature	Description	Priority
Onboarding time	A new academy completes setup and enrolls their first student in under 15 minutes	Must Have
Admin time savings	Admin spends < 30 min/week on fee follow-ups (down from hours)	Must Have
Scheduling accuracy	Zero double-bookings across all coaches and batches	Must Have

Feature	Description	Priority
Fee collection uplift	Monthly fee collection rate improves 20%+ within 3 months	Should Have
Coach adoption	All active coaches log in at least 3× per week	Should Have
Trial conversion	At least 40% of trial tenants convert to a paid plan	Phase 2
Churn rate	Monthly tenant churn below 5% after 6 months	Phase 2

5. Users & Roles

The role system is extensible by design. v1.0 ships with Admin and Coach. Each subsequent release adds a new role without breaking existing ones. Roles are detected automatically after login — no role-selector is ever shown to the user.

Role	Scope & Permissions
Super Admin (CoachPro)	Internal CoachPro staff. Can view all tenants, manage billing, impersonate a tenant for support, push platform-wide announcements. This role exists outside any individual academy.
Academy Admin	Full access within their tenant: manage students, coaches, batches, 1-to-1 sessions, fees, settings, reports, and SMS configuration. Cannot see data of other tenants.
Coach	Restricted to own sessions and student lists. Can view their batch calendar, 1-to-1 schedule, and the students assigned to them. Cannot access fee data or other coaches' records.
Parent / Guardian	(Phase 2) Read-only access to their child's schedule, attendance, and fee payment status. Cannot edit any data.
Accountant	(Phase 3) Access to fee records and the finance dashboard only. Cannot view coaching schedules or student personal details beyond name.

KEY

Role detection is automatic. The system reads the user's role flag from the database immediately after login and silently routes them to their dashboard. No dropdown, no role-selector screen.

6. Functional Requirements — v1.0 Core MVP

6.1 Tenant & Academy Setup

Every tenant (academy) has a settings area where the admin configures their workspace before onboarding coaches and students.

- Academy profile: name, logo, sport(s) offered, address, contact number, timezone.
- Subdomain: auto-assigned on signup (e.g., suncricket.coachpro.app); admin can request a custom subdomain (Pro plan).
- Working hours: define the academy's operational hours to constrain batch scheduling.
- Fee currency and payment modes accepted (Cash, UPI, Card, Cheque) — configurable per tenant.
- SMS sender name/ID configured at tenant level.

6.2 Student (Child Athlete) Management

Admin registers and manages student profiles. Fields are split into required and optional groups:

6.2.1 Required Fields

- Full name, date of birth, gender
- Guardian name, guardian mobile number, guardian email
- Sport(s) enrolled in
- Enrolment date and status (Active / Inactive / Suspended)

6.2.2 Optional Fields — Personal

- Profile photo
- Calling name — the name the student prefers to go by (e.g., 'Chintu' instead of 'Rajesh Kumar')

6.2.3 Optional Fields — Jersey & Kit Details

These fields support team kit ordering and personalisation. All are optional and can be filled in at enrolment or updated later.

- Jersey size — XS / S / M / L / XL / XXL (standard sizes; admin can customise the list per academy)
- Favourite jersey number — the number the student prefers to wear on their kit
- Calling name (on jersey) — the name to print on the back of the jersey; defaults to Calling Name if left blank

NOTE

Jersey fields are optional and purely informational in v1.0. In a future release, the admin can export a Jersey Order Sheet (CSV/PDF) listing all students' names, sizes, and numbers — ready to hand to a kit supplier.

6.2.4 Other Capabilities

- A student may be assigned to multiple batches simultaneously.
- Search and filter by name, batch, sport, calling name, or fee payment status.
- Bulk import via CSV for academies migrating from spreadsheets (jersey fields supported in import template).
- Student profile page shows: batch assignments, upcoming sessions, fee ledger, jersey details, and (Phase 2) attendance history.

6.3 Coach Management

- Admin creates coach accounts: name, photo, mobile, email, sport(s) qualified for, availability windows, status.
- Coach account receives a login invitation by email upon creation.
- System auto-assigns the 'Coach' role — no manual role selection.
- Admin can assign or reassign coaches to batches at any time.
- Coach profile shows batch assignments, upcoming 1-to-1 sessions, and student list.

6.4 Batch Management

- A batch is a recurring group session. Attributes: name/code, sport, coach, days of week, time slot, venue, capacity, monthly fee.
- Conflict detection: system warns admin if a new batch overlaps in time with the same coach's existing batch or uses the same venue.
- Batches can be set as Active, Paused, or Closed. Closed batches are archived but not deleted (fee history preserved).
- Capacity indicator: shows enrolled count vs. maximum. Visual warning when 90%+ full.
- Waiting list: students can be added to a waiting list when a batch is full; admin is notified when a slot opens.

6.5 One-to-One Personal Coaching Sessions

- Admin or coach books a private session: coach, student, date, start time, end time, venue, optional fee override, notes.
- Double-booking prevention: coach and student cannot have two sessions at the same time.
- Session status lifecycle: Scheduled → Completed / Cancelled / No-show.
- Post-session notes field for coach feedback; stored permanently against the student record.
- Fee for 1-to-1 sessions is tracked separately from monthly batch fees.

6.6 Schedule & Calendar View

- Views: Day, Week, Month — switchable with one click.
- Admin view: all batches and all 1-to-1 sessions across the academy, colour-coded by coach.
- Coach view: only their own batches and 1-to-1 sessions.
- Clicking an event opens a details card: participants, venue, session status, notes.
- Admin can drag-and-drop events to reschedule; conflict validation runs before saving.
- Colour legend always visible in the sidebar.
- Calendar is the primary scheduling surface — all session management starts here.

6.7 Fee Management

6.7.1 Monthly Fee Ledger

- Each active student has a monthly fee ledger auto-generated for the current and next two months.
- Each ledger entry shows: month, amount due, amount paid, balance, payment date, payment mode, receipt number.
- Admin records a payment; partial payments are supported with automatic carry-forward of balance.
- If a student joins mid-month, admin can manually set a prorated amount for that month.

6.7.2 Fee Dashboard

- Summary cards: Total Collected this month, Total Outstanding, Overdue count, Collection rate %.
- Filter by batch, sport, coach, date range, or payment status.
- Export to CSV or PDF.
- List of top defaulters with one-click SMS trigger per guardian.

6.7.3 Receipt Generation

- On recording a payment, the system auto-generates a PDF receipt: academy logo, receipt number, student name, amount, date, payment mode, admin signature placeholder.
- Receipt is downloadable and shareable via link.

6.8 SMS Notification System

v1.0 includes a basic manual SMS capability. Automated triggers are Phase 2.

- Admin can send a manual SMS to any guardian from the fee dashboard (one-click per student or bulk).

- Message template is editable by the admin per tenant. Placeholders: {guardian_name}, {student_name}, {amount_due}, {month}, {academy_name}.
- SMS delivery status logged against each ledger entry: Sent / Delivered / Failed.
- Admin can opt individual students in or out of SMS communications.
- SMS credits are part of the subscription plan; admin can see remaining credits in settings.

7. Feature Roadmap — Phase 2 & Beyond

The v1.0 data model and architecture are intentionally designed to accommodate all features below without structural rewrites. These are not afterthoughts — they inform database design and API contracts from day one.

7.1 Phase 2 — Operational Completeness

Feature	Description	Priority
Automated SMS triggers	System auto-sends fee reminders: 5 days before, on, and 3 days after month-end — configurable per tenant.	Phase 2
Attendance Tracking	Coach marks present/absent per session from the calendar. 3 consecutive absences trigger an admin alert.	Phase 2
Parent / Guardian Portal	Read-only login for guardians: view child's schedule, attendance record, and fee payment status.	Phase 2
In-App Notifications	Push/bell notifications for coaches (session reminders, cancellations) and admins (enrolment, overdue fees).	Phase 2
Student Progress Notes	Structured coach notes after each 1-to-1 session. Full coaching history per student visible to admin.	Phase 2
Bulk CSV Import	Import students and fee data from spreadsheets for academies migrating to CoachPro.	Phase 2
Receipt Auto-Email	PDF receipt automatically emailed to guardian on payment recording.	Phase 2

7.2 Phase 2 — Finance Dashboard

The finance dashboard is a significant value-add for academy owners who want business visibility beyond fee collection.

Layer 1 — Revenue Visibility (partial in v1.0)

- Monthly fee collections vs. expected revenue.
- Outstanding and overdue amounts.
- Collection rate % trend across months (chart view).
- Top defaulters list with one-click follow-up.

Layer 2 — Expense Tracking (new in Phase 2)

- Admin logs operating expenses: ground rent, equipment purchases, coach salaries, utilities, event costs.

- Expense categories are configurable by the admin (not hardcoded) — different academies categorise differently.
- Attach photo of bill/receipt to each expense entry.
- Recurring expenses (e.g., monthly ground rent) can be set to auto-repeat.

Layer 3 — P&L View

- Revenue vs. Expenses per month — net surplus or deficit.
- Sport-wise or batch-wise profitability breakdown.
- Coach cost vs. revenue generated by their batches.
- Exportable P&L report (PDF / CSV) for sharing with academy management or investors.

Layer 4 — Forecasting (Phase 3)

- Projected revenue based on current enrolments and fee plans.
- Early warning indicator if expense trajectory will exceed revenue.
- Seasonal pattern detection (exam months, holidays, rainy season dip).

7.3 Phase 3 — Growth & Scale

Feature	Description	Priority
Online Fee Payments	Guardian pays via UPI, card, or net banking directly from the parent portal. Auto-reconciles with the fee ledger.	Phase 3
Coach Payroll Module	Calculate monthly payout per coach based on batches conducted and 1-to-1 sessions. Auto-generate payslips.	Phase 3
Digital Enrolment Form	Public-facing form where parents register their child. On submission, a student record is auto-created for admin review.	Phase 3
Performance Tracking	Coach logs skill assessment scores (speed, technique, strength) per student per session. Monthly progress report card.	Phase 3
Tournament & Event Mgmt	Create internal trials or tournaments. Student registration within the app. Results and rankings tracked.	Phase 3
Certificates & Achievements	Issue digital achievement certificates with QR verification. Shareable by parents on social media.	Phase 3
Multi-Location Support	An Enterprise tenant manages multiple venues or branches under a single account with a consolidated dashboard.	Phase 3
White-Label Option	Enterprise plan: replace CoachPro branding with the academy's own logo, colour scheme, and custom domain.	Phase 3
Analytics & Insights	Student retention rates, batch utilisation, coach performance metrics, churn prediction signals.	Phase 3

8. Key User Stories

Academy Admin Stories

Feature	Description	Priority
Academy Setup	As a new academy admin, I want to complete setup in under 15 minutes so I can invite my coaches immediately.	Must Have
Student Enrolment	As an admin, I want to add a student and assign them to one or more batches so their training is tracked from day one.	Must Have
Batch Creation	As an admin, I want to create a recurring batch with conflict detection so I never double-book a coach or venue.	Must Have
Fee Recording	As an admin, I want to record a fee payment and auto-generate a receipt so I have a clean audit trail.	Must Have
Fee Dashboard	As an admin, I want a real-time view of this month's collections and outstanding dues so I can prioritise follow-ups.	Must Have
Calendar Overview	As an admin, I want to see all sessions across all coaches on one calendar so I can spot gaps and conflicts.	Must Have
1-to-1 Booking	As an admin, I want to book a private coaching session with conflict protection so no one is double-booked.	Must Have
Manual SMS	As an admin, I want to send a fee-reminder SMS to a guardian in one click so I don't have to call individually.	Must Have
Expense Logging	As an admin, I want to log operating expenses by category so I can see if the academy is profitable each month.	Phase 2
P&L Report	As an admin, I want a monthly profit-and-loss summary so I can share it with the academy owner or board.	Phase 2
Online Collection	As an admin, I want parents to pay fees online so cash handling is eliminated and reconciliation is automatic.	Phase 3

Coach Stories

Feature	Description	Priority
Personal Calendar	As a coach, I want to see only my own sessions on the calendar so I have a clean, personal view.	Must Have

Feature	Description	Priority
Student List	As a coach, I want to see the list of students in my batches so I know who to expect each day.	Must Have
Session Notes	As a coach, I want to add notes after a 1-to-1 session so I can track each student's progress over time.	Should Have
Session Alerts	As a coach, I want an in-app notification when a session is cancelled or rescheduled so I'm not caught off-guard.	Phase 2
Attendance Marking	As a coach, I want to mark attendance from my session card in one tap so the record is always up to date.	Phase 2

Guardian Stories (Phase 2)

Feature	Description	Priority
Schedule View	As a parent, I want to see my child's upcoming sessions without calling the academy.	Phase 2
Fee Status	As a parent, I want to see which months are paid and which are outstanding so I'm never surprised by a reminder.	Phase 2
Online Payment	As a parent, I want to pay fees online via UPI so I don't need to carry cash to the academy.	Phase 3

9. Architectural Intent (Non-Technical)

These are not technical specifications — they are product-level principles that must guide every development decision. The engineering team translates these into technical choices.

Principle	Product Intent
Tenant isolation is absolute	One academy's data must never be visible to another, even under error conditions. This is a product promise, not just a technical constraint.
Roles must be extensible	The system ships with Admin + Coach. It must be possible to add Parent, Accountant, or Super Admin without redesigning existing features.
Student ↔ Batch is many-to-many	A student can belong to multiple batches. A batch has many students. This relationship must be foundational, not bolted on.
All money in smallest unit	All fee amounts must be stored in the smallest currency unit (paise in INR, cents in USD) to avoid floating-point errors in financial calculations.
Session as a first-class entity	Both batch occurrences and 1-to-1 sessions must share a common 'Session' concept so attendance, notes, and scheduling logic work consistently across both.
Notifications are pluggable	SMS gateway, email provider, and push notification service must be swappable without changing the product logic. Different tenants may prefer different providers in future.
Expense categories are tenant-configurable	Never hardcode expense categories. Each academy has different cost structures.
Every action is reversible or audited	Fee payments can be voided. Sessions can be cancelled with a reason. A log exists for all significant changes.
Export is always available	Tenant admins must be able to export all their data (students, fees, schedules, expenses) at any time. No data lock-in.
Mobile-first UX	Coaches access the platform on phones. The calendar, session card, and attendance marking must work perfectly on a small screen without a native app install.

10. Out of Scope — v1.0

The following are explicitly deferred to later phases. They are known, planned features — not rejected ideas.

- Online payment gateway integration (Phase 3).
- Parent / Guardian login portal (Phase 2).
- Automated attendance tracking via QR code or biometrics (Phase 3).
- Coach payroll calculation and payslip generation (Phase 3).

- Finance expense tracking and P&L dashboard (Phase 2).
- Multi-location / franchise management (Phase 3).
- White-label branding for Enterprise tenants (Phase 3).
- Performance analytics and student progress reports (Phase 3).
- In-app messaging between coaches and parents (Phase 3).
- Automated SMS triggers (Phase 2 — manual SMS only in v1.0).

11. Assumptions & Constraints

11.1 Assumptions

- Each tenant operates in a single timezone (multi-timezone support is Phase 3).
- Admins have reliable internet access; coaches use the app primarily on mobile with potentially intermittent connectivity.
- A coach belongs to one academy tenant in v1.0; cross-tenant coaches are a Phase 3 consideration.
- Guardians have a valid mobile number registered at enrolment for SMS delivery.
- SMS costs are borne by the tenant as part of their subscription plan (credits model).
- In v1.0, the primary market is India — INR as the default currency, with multi-currency support as Phase 3.

11.2 Constraints

- This document covers non-technical requirements only. Technology stack, cloud provider, database choice, and API design are outside scope.
- v1.0 is a single-sport-per-batch model; multi-sport batches are Phase 2.
- The application must work on modern smartphones as a responsive web app — no app store download required for v1.0.
- GDPR and DPDP (India's Digital Personal Data Protection Act) compliance is a hard requirement from v1.0, not a later addition.

12. Pricing Strategy

CoachPro is a monthly subscription SaaS product — no annual lock-in required. Pricing is tenant-level (per academy), not per-user or per-student. All prices shown are exclusive of 18% GST, which is added at checkout.

12.1 Subscription Tiers

Four tiers are offered. The Free tier acts as the acquisition engine; paid tiers are differentiated by student capacity and feature access.

Tier	Monthly Price	Student Limit	Key Inclusions
Free	₹0 / month	Up to 15	Core student & batch management, 2 batches, 1 coach, no SMS, Powered by CoachPro watermark
Starter	₹999 / month	Up to 60	Unlimited batches, up to 3 coaches, 1-to-1 sessions, full fee ledger, receipt PDF, 100 SMS/mo
Growth	₹1,999 / month	Up to 150	All Starter + up to 10 coaches, 300 SMS/mo, auto-reminders, Phase 2 early access
Pro	₹3,499 / month	Up to 300	All Growth + unlimited coaches, 600 SMS/mo, finance dashboard early access, priority support
Enterprise	Custom pricing	Unlimited	Custom limits, SLA, white-label, dedicated onboarding, multi-location, API access

12.2 Pricing Principles

- Monthly billing only — no annual commitment required. Deliberate differentiator against competitors with annual-only cheap plans.
- No per-user charges — the flat monthly fee covers all coaches and admin users within the academy.
- Feature gating, not discounting — upgrades are triggered by needing a feature (auto-reminders, attendance, finance dashboard), not a discount offer.
- SMS credits are included in each paid tier. Additional credits can be purchased as top-ups at ₹0.20 per SMS.
- GST (18%) is added at checkout for all Indian tenants. GST invoice issued monthly for compliance.

12.3 Free Tier Design

The Free tier is designed to convert, not to retain. Its limits are intentionally tight:

- 15-student cap — any real academy hits this within weeks of starting.
- 2-batch cap — forces a Starter conversation within the first month.
- Powered by CoachPro branding on all receipts and parent-facing communications — passive marketing.
- No SMS — fee reminders require manual follow-up, which is the core pain point that drives upgrades.
- No 1-to-1 session management — coaches doing private coaching have immediate motivation to upgrade.

GOAL

The Free tier should make an admin feel the power of CoachPro within 10 minutes, then feel the ceiling within 30 days. That tension drives conversion without any sales call.

12.4 Estimated Infrastructure Cost & Break-Even

Based on early-stage deployment on managed cloud infrastructure (AWS / Render + managed PostgreSQL + MSG91 SMS):

Scenario	Monthly Infra Cost	Break-Even Paid Tenants
0-30 total tenants (launch phase)	~₹5,600 / month	6 Starter tenants
30-60 total tenants (early growth)	~₹8,500 / month	9 Starter or 5 Growth tenants
60-150 total tenants (scaling)	~₹12,000 / month	12 Starter or 6 Growth tenants
150-300 total tenants (mature)	~₹18,000 / month	18 Starter or 9 Growth tenants

Infrastructure costs scale sub-linearly as tenants grow. A healthy mix of Starter (60%) + Growth (30%) + Pro (10%) tenants generates positive cash flow from month 3 onwards with modest growth.

12.5 Competitive Positioning

Product	Starting Price	Billing Model	Key Difference
CoachPro	₹999/mo (paid)	Monthly, no lock-in	Finance dashboard, jersey management, flexible billing
Sportia	₹799/mo	Annual only (+18% GST)	More features today, but annual commitment required
Shareplay	~₹1,000+/mo	1% of transactions	Cost unpredictable; penalises high-revenue academies

Product	Starting Price	Billing Model	Key Difference
EduSys	₹999-₹13K/mo	Custom / quote-based	Enterprise-heavy; not suited to small academies

12.6 Future Pricing Considerations

- Annual plan (save 20%) — introduce in v1.1 once monthly churn data is available to price the discount correctly.
- Online payment transaction fee — when Razorpay integration launches (Phase 3), CoachPro takes 0% platform cut; gateway fee passed through transparently.
- Jersey Order Export — may become a paid add-on (₹199 per batch export) or bundled into Growth and above.
- White-label Enterprise pricing — custom negotiated; minimum 12-month commitment at ₹10,000+/mo.

13. Open Questions

Feature	Description	Priority
Q1 — Fee frequency	Are fees always monthly, or do some academies charge quarterly or per-term? The ledger model must support this from day one.	Must Have
Q2 — Trial length	What is the free trial period — 14 days, 30 days, or session-count based (e.g., first 50 sessions free)?	Must Have
Q3 — SMS gateway	Which SMS gateway is preferred for the Indian market — MSG91, Exotel, Twilio, or Gupshup? Determines Phase 2 effort.	Should Have
Q4 — Attendance v1	Should v1.0 include a basic attendance-marking feature, even if reporting is Phase 2?	Should Have
Q5 — Prorated fees	If a student joins mid-month, is the fee prorated automatically or manually entered by admin?	Should Have
Q6 — Coach payout	Will the Coach Payroll module need to handle TDS deduction and Form 16A generation for Indian tax compliance?	Phase 2
Q7 — Multi-sport coach	Can one coach conduct batches across multiple sports? Affects scheduling and conflict detection logic.	Must Have
Q8 — White-label timing	At what tenant count or revenue milestone does white-label become a priority to unlock Enterprise deals?	Phase 3

14. Suggested Release Roadmap

This is a product roadmap — not a committed engineering timeline. Exact dates depend on team size and velocity.

Release	Milestone	Key Deliverables
v1.0	Core MVP	Tenant setup, student & coach management, batch creation, calendar, 1-to-1 sessions, fee ledger, manual SMS, receipt PDF
v1.1	Operational polish	Attendance marking, in-app notifications, receipt auto-email, CSV bulk import, waiting list management
v2.0	Parent & Finance	Parent / Guardian portal (read-only), automated SMS triggers, expense tracking, Layer 1–2 finance dashboard
v2.1	Payments	Online fee payments (UPI / Razorpay), auto-reconciliation, payment links sent via SMS
v3.0	Growth features	Coach payroll, performance tracking, digital enrolment form, tournament management, certificates
v3.1	Enterprise & Scale	Multi-location support, white-label branding, advanced analytics, forecasting, franchise dashboard

NOTE

Build v1.0 lean. But design every database table, every API contract, and every UI component as if v3.1 is coming. The cost of redesigning a fee model or role system mid-product is 10× the cost of designing it right the first time.

15. Glossary

Feature	Description	Priority
Tenant	A single academy workspace on the CoachPro platform. All data is scoped to a tenant.	—
Multi-tenancy	Architecture where one platform serves many independent academies, each isolated from the others.	—
Batch	A recurring group training session with a fixed coach, schedule, sport, and venue.	—

Feature	Description	Priority
1-to-1 Session	A private individual coaching session booked between one coach and one student.	—
Academy Admin	Full-access user within a tenant. Cannot see other tenants.	—
Coach	Trainer with access limited to their own sessions and student lists.	—
Guardian	Parent or legal guardian of a student; primary contact for fee communications.	—
Fee Ledger	Month-wise record of fees due and payments made for a student.	—
P&L	Profit and Loss statement — revenue minus operating expenses for a period.	—
SMS Gateway	Third-party service (MSG91, Exotel, Twilio) used to deliver text messages.	—
SaaS	Software-as-a-Service — cloud-hosted software accessed via a browser, paid by subscription.	—
DPDP Act	India's Digital Personal Data Protection Act — governs collection and use of personal data.	—
White-label	Enterprise feature: the platform UI shows the academy's own branding instead of CoachPro's.	—
Calling Name	The informal name a student prefers to be called by coaches and on kit (e.g., Chintu instead of Rajesh Kumar).	—
Favourite Number	The jersey number a student prefers to wear; stored for use when ordering team kit.	—
Jersey Size	Optional student field (XS/S/M/L/XL/XXL) used to compile kit orders.	—
Break-even	The minimum number of paying tenants needed to cover monthly infrastructure costs.	—
